

Meet Your Secondary Brains

Managing the information flood has become a major challenge of the Internet age. The number of information sources and communication channels has multiplied in the last few years. You have to read emails, respond to instant messaging, scan various web sites every day – not to forget the ‘classic’ channels, letters, paper documents, newspapers, magazines, phone, and TV.

DEVONtechnologies’s applications give you a helping hand. They are all about finding, storing, organizing, and navigating information: from emails, chat logs and web clippings to scanned paper documents. Based on genuine artificial intelligence, DEVONagent masters the data mass of the Internet and DEVONthink keeps all your knowledge together, helps you organize it, and makes it easily accessible.

The Mac Experience

All DEVONtechnologies applications are made with the typical Mac user in mind: Creative, savvy, and with a sense for quality software. In addition, all programs use artificial intelligence to provide superior features that cannot be found in any other application for the Mac. Meet your secondary brains!

THE DEVONTECHNOLOGIES PORTFOLIO	
	DEVONthink Intelligent information manager
	DEVONagent Intelligent Internet research assistant and alternative web browser with built-in archive
	DEVONnote Intelligent notepad for your notes, thoughts and bookmarks

The Almost Complete Guide to
**Information
Management**
on the Macintosh

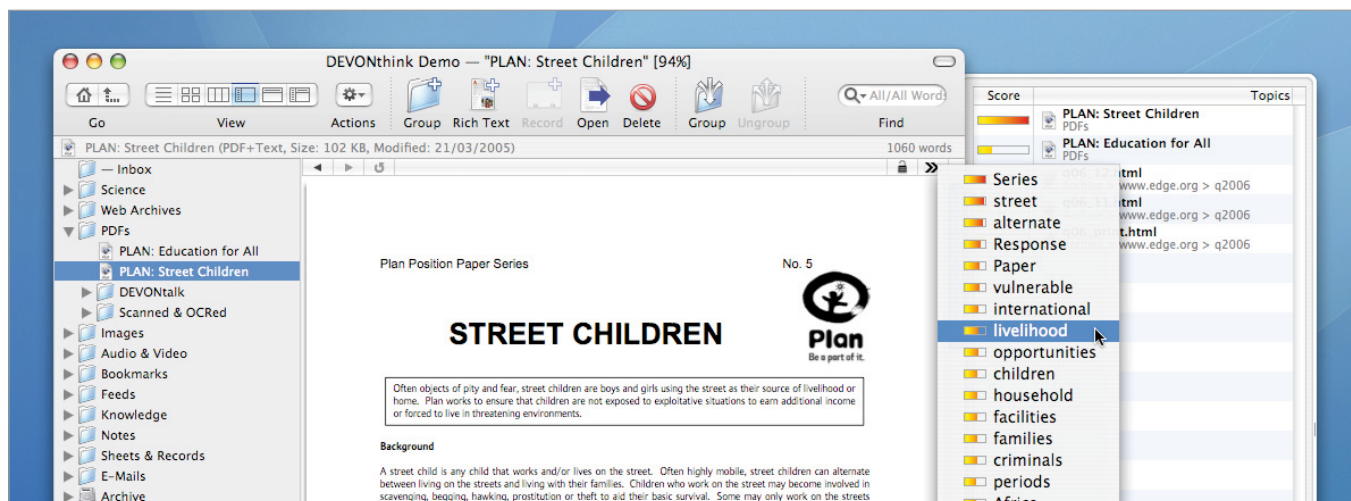

In today's world, everything is digital. From shopping receipts to important research papers, your life often fills your hard drive in the form of emails, PDFs, Word documents, multimedia files. Questions eventually pop up, like: Where do you store all of this stuff?

Enter DEVONthink: The solution to the digital age conundrum. It is your second brain, the one and only database for all your files and documents. Boasting a refined artificial intelligence, DEVONthink is exceedingly flexible and adapts to your personal needs.

It assists you with both filing documents and with finding similar items, and it can help you make connections that you might have missed on your own. And if the files are not digital yet, digitize them as searchable PDFs with DEVONthink Pro Office.

DEVONTHINK AT A GLANCE	
Supports many file formats: text, RTF, PDF, QuickTime,...	Clips data from any source via Services and the Dock
Helps organizing and navigating with artificial intelligence	Full screen rich text editor with cross-references
Integrates local documents with live web sources	Read RSS feeds and clip important data to your database
Capture paper documents and make them searchable	Import email including formatting and attachments
Share your knowledge via web sharing	AppleScript and Automator support

Use it as your document repository, your filing cabinet, your email archive, your project organizer, or your work environment; DEVONthink can do it all. You can even collect and organize data from the web for your own use, enrich it with sound and movie files from your hard drive, and publish it or share it on your local network or on the Internet.

With over 100 million websites up and running, it's almost impossible to expect simple search sites to help you master this unbelievably huge mass of data. DEVONagent can help.

It communicates with search engines, digs through all the results for you, and gives you only those documents that are really worth reading. Even better: It

summarizes the collected data and presents you with a list of the most important topics, as well as an interactive mind map to help make sense of the findings.

DEVONAGENT AT A GLANCE
Topics and Visualizer make navigating results easy
Automate repeating tasks with sets and AppleScript
Filters and 'Scanners'
Integrated archive
Research-centric web browser based on Safari
